

BLOCKCHAIN REVOLUTION GLOBAL RESCHEDULED TO APRIL OF 2022

Toronto, CANADA; September 8, 2021 – To ensure an engaging and global face-to-face experience, the [Blockchain Research Institute](#) and [MCI Canada](#) have rescheduled the [Blockchain Revolution Global](#) conference to April 21-22, 2022. We look forward to bringing together the foremost leaders, speakers, builders, and innovators in the enterprise blockchain ecosystem, to explore digital innovation and transformation for a post-pandemic world.

"Our vision for Blockchain Revolution Global has grown much bigger than what was possible under the current landscape in Ontario. Our speakers, sponsors, partners, and attendees deserve an innovative face-to-face experience that outshines what they had in 2020, and we plan to give that to them next spring." said Don Tapscott, Co-founder and Executive Chairman of the Blockchain Research Institute.

Meanwhile, we will continue to host the Enterprise Blockchain Awards (EBAs) this November as a live and dynamic virtual experience. In the spirit of last year's virtual awards gala, the 2021 EBAs will feature [extraordinary hologram technology on a virtual stage](#).

The virtual EBA ceremony will stream November 16 and will recognize the exceptional leaders, researchers, innovators, entrepreneurs, and service providers driving global enterprise blockchain transformation. After the event, EBA winners will be featured in a BRI webinar series running from November until Blockchain Revolution Global kicks-off next year.
